

A wide-angle photograph of a large-scale indoor hydroponic grow room. The space is filled with long, straight rows of lush green leafy plants, likely lettuce, growing in a structured system. Above the plants, a complex network of metal trusses supports multiple long, horizontal racks of bright blue LED grow lights. The perspective is from the center of a long aisle, looking down the length of the facility, which creates a strong sense of depth. The overall lighting is a cool blue, characteristic of high-quality horticultural LEDs.

GROW LED SOLITION

ÜRÜN KODU : GLT-150-UFO

KULLANILAN LED MARKASI : SAMSUNG LED

KULLANILAN LED SÜRÜCÜ : MEANWELL HLG SERİSİ

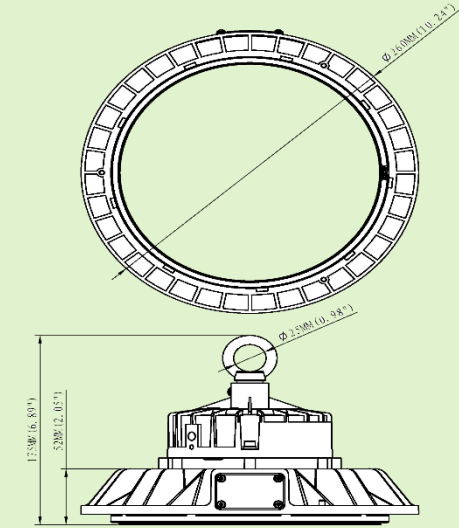

TOPLAM GÜÇ : 150 WATT

ÇALIŞMA VOLTAJI : 220 VAC

LED LÜMEN : 160 lm/watt

LED RENGİ : SPECTRUM

KORUMA SINIFI : IP65
